Netscout
Bangalore, India

November 8, 2021

Dear Recruiter,

My name is Sonali Singh, a Senior Computer Science student at UIET Kurukshetra. I would like to apply for the Intern position at Netscout.

I am a web developer and possess an in-depth understanding of both front-end and back-end technologies. During my 6 months internship at Text Mercato, I was primarily responsible for creating serverless applications as well as coding using React, Vue and NodeJS to build full stack applications. Furthermore, I developed a website from scratch and integrated several AI tools into it for product demo.

Outside of work, I actively seek out new technologies and stay up-to-date on industry trends and advancements. This has allowed me to stay ahead of the curve and build exceptional projects like review analyzer chrome extension, school management system ,etc.

Talking about soft skills, My strengths include my ability to learn things fast and gaining expertise in them. Besides, I am an exceptional team player with great communication skills. Also, I was the tech lead of web development at DSC UIET, where I conducted various workshops and managed the club for a year.

My internship experience and strong problem solving skills makes me a perfect fit for the role. I am eager to apply my knowledge and expand my conceptual skills and wish to do that through this position at Netscout.

Thanks and Regards,

Sonali Singh
